

Ahmed Elsayed

AI Engineer | LLM Systems | RAG & Agentic Pipelines

Cairo, Egypt (Open to UAE Relocation) • ahmedgaball994@gmail.com • +20 101 723 0586 • linkedin.com/in/ahmed-gabal-09a8b32a3 • github.com/AHMEDGabal1

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building LLM-powered applications from prototype to deployment. Shipped a RAG-based tender discovery platform (ForsaHunt) that reduced sales research time by 70% and was adopted by the sales team within one week. Experienced with LangChain, LangGraph, FAISS, FastAPI, and Azure OpenAI. Seeking AI Engineer roles to deepen expertise in agentic systems and production MLOps.

TECHNICAL SKILLS

Languages & Core: Python, SQL, Bash, Java

LLM & Generative AI: RAG, Prompt Engineering, Fine-Tuning (LoRA/QLoRA), AI Agents, Multi-Agent Systems, LangChain, LangGraph, OpenAI API, Azure OpenAI, Claude API, Meta LLaMA

ML & Deep Learning: Transformers, NLP, Computer Vision, PyTorch, TensorFlow, Scikit-learn, Hugging Face, FAISS, Vector Databases

MLOps & Deployment: Docker, FastAPI, RESTful APIs, Git, GitHub Actions, CI/CD

Frontend: React.js, WebSocket, Responsive Dashboard Development

Cloud: Azure (OpenAI, Fundamentals), AWS, GCP

Workflow Automation: n8n, Autonomous Pipelines, Tool-Calling Agents, Webhooks

Languages: Arabic (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Founder & AI Engineer — ArabBot Studio

Jan 2026 – Present

Remote

- Founded a no-code multi-tenant SaaS platform enabling Egyptian SMBs to deploy AI-powered WhatsApp chatbots that understand Egyptian Arabic dialect.
- Architected a 5-stage AI pipeline: dialect normalization → 9-category intent routing → RAG retrieval → response generation, using LangChain, Google Gemini 2.0/2.5, and FAISS vector search.
- Built an async FastAPI backend and React 19 + TypeScript dashboard with JWT authentication, workspace isolation, and PostgreSQL/Redis infrastructure. Achieved ~45 ms webhook ACK and ~120 ms p95 AI response latency.

Stack: Python · FastAPI · LangChain · Google Gemini · FAISS · React 19 · TypeScript · PostgreSQL · Redis · Docker

AI Engineer — Freelance

Jul 2025 – Present

Remote

- Built agentic AI systems and RAG architectures for SME clients in Egypt and the UAE, deepening hands-on experience with Azure OpenAI and LangGraph multi-agent orchestration.
- Prototyped n8n workflow automations for AI-powered business process pipelines, including lead qualification and customer support routing.

Stack: Python · LangGraph · Azure OpenAI · n8n · FastAPI · Docker

LLM Developer & Full-Stack AI Engineer (Contract) — I-Gamify

Apr 2025 – Jun 2025

Cairo, Egypt · B2B SaaS Startup (~10 employees)

- Built ForsaHunt end-to-end — a RAG-powered tender discovery platform — as the sole AI engineer on a 3-month contract. Product adopted by the sales team within the first week of deployment.
- Designed a LangChain + FAISS semantic matching pipeline that matched tenders to company profiles, reducing irrelevant results by 80% versus baseline keyword search across 10,000+ tender documents.
- Developed real-time multi-criteria scoring and filtering via FastAPI async endpoints, cutting manual sales research time by 70%.
- Delivered a React.js dashboard with live WebSocket notifications; system processed 500+ daily queries with sub-2-second p95 response latency.
- Containerized the full stack with Docker for zero-downtime deployment; optimized OpenAI API prompts to reduce token usage by 30%.

Stack: Python · FastAPI · LangChain · FAISS · OpenAI API · React.js · Docker

KEY PROJECTS

Dentlyzer — AI Dental Care Platform (Graduation Project, Grade A+) — Alamein International University 2025 – 2026

- Built an AI X-ray analysis engine (PyTorch + Computer Vision) that reduced diagnostic reporting time by 60% versus manual review across 500+ X-ray cases.
- Integrated AlignSmart Kit for remote aligner tracking, eliminating 3 in-person check-up visits per treatment cycle.
- Automated patient documentation, saving 2+ admin hours per dentist per day.
- Delivered a unified production platform integrating intraoral scanner support, AI diagnostics, and patient management — awarded A+ by faculty panel, top-ranked in cohort.

Stack: PyTorch · Computer Vision · NLP · FastAPI · React.js · Medical AI

Translation & Summarization Microservices Platform — Personal Project 2025

- Designed a microservices architecture with independent per-service scaling, achieving zero-downtime deployments with containerized load balancing.
- Reduced average summarization latency by 40% through async processing; integrated multiple LLM backends via a unified REST API gateway.

Stack: Python · FastAPI · Docker · LangChain · REST APIs · Microservices

Sports Classification & Action Recognition — Deep Learning Research Project 2024

- Achieved 94% classification accuracy on a 20-class sports dataset using a fine-tuned Swin Transformer.
- Integrated BERT sentiment analysis for multi-modal video + text insights.

Stack: PyTorch · Swin Transformer · BERT · Computer Vision · TensorFlow

EDUCATION

B.Sc. in Artificial Intelligence Engineering — Very Good — Alamein International University Sep 2021 – Jan 2026

Alamein, Egypt

- Specialized program covering machine learning, deep learning, computer vision, and natural language processing.
- Graduation Project (Dentlyzer): Grade A+ — top-ranked in cohort. MOU partnership with University of Louisville (UofL) recognized by faculty.

TRAINING & PROFESSIONAL DEVELOPMENT

Data Science Trainee — Digital Egypt Pioneers Initiative (DEPI) Mar 2024 – May 2024

Government-Backed AI Program

- Completed 200+ hours of applied ML training: supervised learning, data pipelines, cloud deployment fundamentals. Delivered a team capstone project end-to-end within a 3-week sprint.

Stack: Python · Scikit-learn · Pandas · NumPy · Cloud Technologies

AI For Business — Technical & Freelance Track — National Telecommunication Institute (NTI), Egypt

Faculty of Engineering, Computer Engineering & Business Informatics Programs

- 90-hour technical track: data analysis, supervised/unsupervised ML, deep learning (CNNs, RNNs) using Python, Pandas, Scikit-learn, TensorFlow/PyTorch. 30-hour freelance career track: client acquisition, project management, freelance platform positioning.
